

ARTHER FINE ATTORNEY

Art is an adventure traveler, having traveled to some 140 remote and challenging countries. He's a river rat (rafter) and trekker/hiker. He is a want to be tennis player who sometimes resorts to pickle ball. He's an undergraduate of U.C. Berkeley, a juris doctor of Berkeley (Boalt) Law School, a former visiting law lecturer at the University of Auckland Law School, New Zealand, and a sometime law lecturer for UCLA continuing education. He's been a litigation partner of Hahn Cazier, Fulop Rolston, and for the last 38 years and continuing at Mitchell Silberberg & Knupp, LLP. He's the counsel general of the Ellen Meadows Prosthetic Hand Foundation ("EMPHF"), the Vice-Chair/Director of the Beckman Laser Institute, Inc. non-profit, and a long time and only mainland Director of AMM.

Art and his wife Margie Fine M.D., FACS, have led AMM surgical missions for close to a decade. Those have included first time AMM missions to Honduras, Guatemala, Nicaragua, Ecuador, Cambodia, and India. Art through his relation to the inventor of LN-4 prosthetic hands and the EMPHF brought prosthetic hands to AMM, and has included them as an integral part off all his AMM led missions.
